Hasmath, examining the Canadian case, concludes that exclusionary discrimination is not the only potential explanation for ethnic penalties. Conditions such as an individual's social network, a firm's working culture, and a community's social trust should be strongly factored. [3] Emerging work by behavioral economists, psychologists, and sociologists reinforce the premise that the ethnic penalty is not simply

The ethnic penalty is defined as the economic and non-economic disadvantages ethnic minorities experience in the labour market compared to non-ethnic minority groups of the same human and social capital. Heath and Ridge originally look at the ethnic penalty by making comparisons between two groups in Britain, whites and blacks. They note that unemployment of black African men is twice as
